Bachelor's Degree (Computer Science)

University details available on request

SKILLS

Flutter, Dart

Clean Architecture

Firebase, Supabase

Realtime Systems

REST & AI APIs

IAP & Subscriptions

PROFESSIONAL SUMMARY

Lead Flutter Architect with 4+ years of experience building scalable mobile applications. Specialized in clean architecture, realtime workflows, API integrations, and business-aligned mobile engineering.

CORE EXPERIENCE

- Architected and delivered production Flutter apps across fintech, health, gov-tech, social, and productivity domains.
- Built realtime systems and event pipelines supporting live updates, status tracking, and collaborative workflows.
- Implemented robust monetization with subscription and in-app purchase lifecycle management.
- Integrated AI and third-party APIs for intelligent product features and automation capabilities.
- Led delivery collaboration with product and engineering teams to ensure stable, scalable releases.

SELECTED PROJECTS

Mooch

Secure fintech lending workflows with loan lifecycle orchestration and analytics.

USCIS App

Applicant status and document tracking with secure access and high-availability sync.

Venvoi

Realtime location-based voice social app with live sessions and moderation tooling.

HealthSteps

Health experience with progress tracking, real-time insights, and engagement systems.
