faizaalam.netlify.appEnglish - Professional

Product Engineer with 5+ years of end-to-end delivery experience turning product requirements into reliable software across mobile applications, backend services, cloud functions, payments, operational portals, releases, and continuous improvement. Comfortable working directly with clients and owning difficult features through production.

CORE SKILLS

- Product Delivery:** Requirements, feature ownership, architecture, releases, maintenance
- Product Infrastructure:** Firebase, Supabase, Cloud Functions, REST, WebSockets, admin portals
- Client Experience:** Flutter, mobile UX, authentication, payments, maps, notifications
- Execution:** Testing, CI/CD, GitHub Actions, stakeholder communication, mentoring

PROFESSIONAL EXPERIENCE

Software Developer

Snapbudd.io

Current

- Own customer and driver apps, merchant, company and admin portals, backend APIs, Cloud Functions, deployment, releases, security, and maintenance.
- Built Stripe Connect payments and automated payouts plus live tracking, maps, notifications, and multi-role delivery workflows.

Technologies: Flutter, Firebase, Cloud Functions, Stripe Connect, Google Maps, FCM, REST APIs

Software Engineer

Willoww Ltd

Part-time

- Deliver Flutter features and production support across STYRIA, Let's Get Fit, FOMO, DiaHive, HealthSteps, MindOra, and ProtnEase.
- Work across AI integrations, subscriptions, social and health features, payments, notifications, and app-store delivery.

Technologies: Flutter, Firebase, Supabase, RevenueCat, AI integrations, FCM

Flutter Software Engineer

Aeyron

2024 - 2025

- Built Graid, an AI card marketplace for valuation, listings, secure transactions, and trading; led architecture and feature development.

Freelance Software Engineer

International Clients

2023 - 2024

- Delivered MOOCH, MCQsLearn, and VenVoi; owned Flutter implementation, backend integrations, client communication, and store releases.

Flutter Developer

Softwarehub.pk

2021 - 2023

- Built Walking Challenge and Work Life Organiser with challenge, leaderboard, productivity, reusable UI, and backend-integrated workflows.

ROLE FOCUS

- Clarify business requirements, technical constraints, and user outcomes before choosing implementation details.
- Deliver small production-ready slices while protecting security, maintainability, and future product change.
- Stay accountable after launch through release ownership, maintenance, feedback, and product evolution.

SELECTED PRODUCTS
